🏠 PROFILE

Software developer with 8+ years of commercial experience across web, mobile and backend. I build native Android apps in Java, cross-platform apps in Flutter, and web applications in React, Next.js and Astro - From public marketing sites through authenticated client portals to safety-critical internal tools. I work well in long-running products: reading someone else's code, fixing what breaks in production, and shipping features that hold up.

🏢 EXPERIENCE

2026 - PRESENT

Slovakia

GEODE S.R.O.

FULL-STACK DEVELOPER

Custom CRM systems built to measure for each company's real processes.

- CRM for Elmont 2H: clients, orders, documents and automated background jobs modelled on the company's actual workflow instead of an off-the-shelf box.
- Monorepo architecture - Next.js Frontend, NestJS API, PostgreSQL, MinIO object storage and BullMQ workers, all shipped in Docker.
- Data modelling, REST API design and role-based access for day-to-day company operations.

JUN 2023 - PRESENT

Poprad, Slovakia

RIFM S.R.O.

WEB / FULL-STACK DEVELOPER

Public site and client portal of RebelsFunding, a proprietary trading platform.

- Features for rebelsfunding.com and the rf-zone.rebelsfunding.com client area - evaluation programs with simulated capital up to \$320,000, challenges, account metrics and payouts.
- Building and maintaining UI components and forms in React, Next.js and TypeScript.
- Integrating the frontend with backend APIs, including existing PHP services.
- Fixing production issues and maintaining a live codebase under real traffic.

rebelsfunding.com rf-zone.rebelsfunding.com

NOV 2021 - PRESENT

Žilina, Slovakia

ENNOVA S.R.O.

ANDROID / JAVA DEVELOPER

Long-running work on software for Dräger (Germany), a global leader in medical and safety technology: a web application, a native Android app and a desktop tool that talks to measuring devices.

- Development and maintenance of React web applications and their integration with REST APIs.
- Native Android application in Java (MVVM, barcode scanning, local data) for inventory management of devices, vehicles and personnel.
- Java desktop application for communication with and processing of data from measuring devices, plus the Protector plugin used in safety-critical environments.
- Debugging, refactoring legacy code and resolving production incidents across all three platforms.
- Scripting and internal tooling (Python, partly Flutter).

 SELECTED PROJECTS

ENNOWINE Flutter · Dart · SQLite	Offline-First app for managing wine production and cellar inventory - wines, batches and stock on a local database, so it works where the Wi-Fi doesn't.
ELMONT 2H - CRM Next.js · NestJS · PostgreSQL · Docker	Tailor-made CRM: clients, orders, document storage and background jobs in a Dockerised monorepo.
NIS - ING PROJEKT Java · SQL · REST	Hospital information system: patient records, scheduling, staff roles and access control across departments.
SAMUELSLIVOVSKY.COM Astro · React · PixiJS · Kaplay	This portfolio - a static site built as a black & white CRT arcade, with a playable bonus stage. You are reading its CV page.

 EDUCATION

2022 - 2024 EQF 7	ING. (MSc) - Biomedical Informatics University of Žilina
2019 - 2022 EQF 6	BO. (BSO) - Informatics University of Žilina
2013 - 2018 EQF 4	MATURITA - Technology and design Secondary School of Engineering and Design, Poprad

 SKILLS

LANGUAGES	Java · TypeScript · JavaScript · Dart · Python · SQL · PHP
FRONTEND	React · Next.js · Astro · HTML · CSS · Tailwind
MOBILE	Android (Java, MVVM) · Flutter
BACKEND & DATA	NestJS · REST APIs · PostgreSQL · SQLite
TOOLS & OPS	Git · Docker · Gradle · BullMQ · MinIO · WordPress

 LANGUAGES

SLOVAK	Native
ENGLISH	B2 - independent user
